## How to measure

While taking the measurements please make sure that the measuring tape is in level, neither too loose nor too tight.

* Shoulder: Measure straight across from one end of your shoulder bone to the other.
* Bust: Measure the circumference of your bust by taking the measuring tape around the fullest part of the bust.
* Waist: Measure the circumference of your waist by taking the tape around your natural waistline, which is above the belly button and below the rib cage.
* Hip: Stand with your knees and feet together and then measure the circumference of your hip by wrapping the tape around the fullest part of your hip.

| Customized Clothing | We understand that sometimes, readymade clothes are not what customers are looking for. We are, therefore, open to requests for bespoke orders. We generally need the following measurements, in inches, for customized outfits. |
| :---: | :---: |
|  | - Shoulder <br> - Bust <br> - Waist <br> - Hip <br> - Length <br> - Sleeves Length (Full sleeves, one fourth sleeves or Half sleeves) |
|  | For some pieces, we might need additional measurements on top of the standard ones. In such a case, we will contact you. |

Note: Please write to our customer care team for any customization hello@fine-threads.com
